

MagClean Genie

Magnetic Water Conditioner MAGCLEAN

As water molecules pass through the powerful, highly focused magnetic field, two things happen: molecules are polarized (organized) and the water takes on a net positive (+) charge. This physically changes the water's molecular structure. A soft calcite rhomboidal crystalline structure which may be washed out, flushed out, of the water stream is formed instead of a naturally occurring hard crystals. Thus preventing scale formation and gives soft water feel. These powerful magnets also create de-gasification, which decreases the taste and smell of chlorine. Water becomes wetter and softer. It reduces surface tension of water by increasing solubility.

- Reduce Electricity Bills • Reduce Maintenance of Appliances •

MAGCLEAN avoids scaling in the water lines and Appliances like Washing machine, Dish washer etc. Use of MAGCLEAN gives cleaner clothes, dishware and reduce or eliminate scale marks on tiles, glasses, car and other items.

MAGCLEAN's Genie's Benefits

- MagClean Genie prevents scaling in washing machine and dishwasher which extends the life of machines and avoids costly repairs.
- Lower surface tension of water which gives better solubility of detergent and helps in removing dirt from clothes and dishes.
- Soap/detergent scum are avoided and hence clothes are cleaned and fabric remains soft.
- Less use of detergent saves money and also provides better rinsing with water. Saves environment by lower detergent, being drained.
- Anti-scaling properties increases efficiency of machines and consumes less electricity. Lower electricity bills, saves money.
- No chemicals, no maintenance, very long life without any trouble.
- Magnetization of water also helps in checking fungal and bacterial growth in machines.
- Fits all types of Machines - Semi Automatic, Fully Automatic, Top Loading, Front Loading Washing Machines & Dishwashers.

MagClean Genie

Universal Model - Fits All

- Fit the MagClean Genie to the water inlet of washing machine or dishwasher and the hose pipe to the magclean Genie as showing in fig.1
