

MagClean RO⁺

INTRODUCTION

As water molecules pass through the powerful, highly focused magnetic field, two things happen, molecules are polarized (organized) and the water takes on a net positive (+) charge. This physically changes the water's molecular structure. A soft calcite rhomboidal crystalline structure is flushed out of the water stream instead of a naturally occurring hard crystals. Thus, preventing scale formation and biofouling of membrane. It reduces surface tension of water by increasing solubility.

BENEFITS

- MagClean RO⁺ prevents scaling in membrane and enhances life.
- No chemicals, no maintenance, very long life without any trouble.
- Helps in checking fungal and bacterial growth.

INSTALLATION:

For best results install it before membrane, input line of membrane housing.

Pure N Safe Water Technologies Pvt. Ltd.
